QUALITY MANUAL

QUALITY POLICY STATEMENT

Sunset Industries Inc. specializes in machining precision components and assemblies for various industries, primarily aerospace. It is our goal to supply our customers with the highest quality products, delivered on time, and to meet and exceed our customer's satisfaction.

Our customers expect our products to be of the highest quality and done so at a competitive price. We will meet these expectations with the help of a highly skilled workforce, the latest technology, and our entire company being committed to continued improvement through our AS9100 Quality Management System.

Quality issues that arise will be identified and handled quickly and attentively by a member of our Quality team. It is our goal to make quality and customer satisfaction our number one priority. It is the role of our Quality Manager to ensure the requirements of our quality system are adhered to and properly carried out. If a problem arises that cannot be handled by a member of our staff it shall be brought to my attention for final resolution.

Sunset Industries Inc. has a foundation built on quality and integrity to meet and exceed our customers' requirements. It is our goal to continue this tradition and build on it through our AS9100 Quality Management System.

We promote a commitment to satisfy applicable requirements, continual improvement and setting of Quality Objectives established within our AS9100 system.

Tony Hauptman

General Manager
